Information Bulletin No. NI-99-005

To: All ADs

From: Director, National Information Resources Management Center

Subject: National Systems Maintained by National Information Resources
Management Center (NIRMC)

DD: 5/14/99

The year 2000 certifications of BLM's national systems are complete, and NIRMC now can begin working on the backlog of maintenance work orders. Many of these national systems are more than ten years old and nearing the end of their life cycle. From a life cycle perspective, we need to know what is planned for each system. Specifically, do you plan to add new functionality to the existing application, retire or cancel the system, or reengineer the process and then replace the system with either a commercial-off-the-shelf (COTS) system or an in house-developed system? Additionally, we need to know when changes may be made and who you anticipate doing the work. Attached is a form listing the systems each AD is responsible for. Please fill in the appropriate information and return to Rick Graham (NI-120) by May 14, 1999.

Rick Graham will forward the backlog of maintenance work orders to the systems' user representatives for their determination of what work still needs to be done. If you have any questions, please contact Rick Graham, Chief, Division of IRM Applications Support (NI-120), at (303) 236-6539.

Signed by:
Scott E. MacPherson
Director, NIRMC
